

# 4 QUESTIONS TO HELP YOU OUTWIT HACKERS

WHAT DATA  
IS **AT RISK**  
IN MY  
NETWORK?

WHO HAS  
**ACCESS TO**  
VULNERABLE  
DATA?

HOW CAN  
ATTACKERS  
**GAIN ACCESS**  
TO THE DATA?

WHAT  
WOULD A  
BREACH  
**COST?**

## MSP RISK INTELLIGENCE HAS THE ANSWERS

SolarWinds® MSP Risk Intelligence scans your network (including shared drives, end-points and cloud-based, hosted services like Dropbox®, Google® Drive and Microsoft® OneDrive®) for vulnerabilities and the presence of unsecured confidential, personal, or regulated data. From this the software calculates and presents an estimated financial liability amount.

LEARN THE  
**FINANCIAL IMPACT**  
OF UNPROTECTED DATA

GET  
**ACTIONABLE**  
INSIGHT

MSP Risk Intelligence provides specific, actionable, and timely information to help you remediate the many internal and external risks of system compromise and data loss.

Stand out as a security leader—use MSP Risk Intelligence to secure sensitive data and protect your company from the debilitating costs of a data breach.

STAND OUT AS A  
**SECURITY LEADER**

PROVE **VALUE**  
LIKE NEVER BEFORE

MSP Risk Intelligence generates reports that allow you to demonstrate the value of comprehensive security services and efficient delivery of IT services. MSP Risk Intelligence calculates an estimated risk in financial terms based on the PII (personally identifiable information) or payment card data found on each device, the severity of the vulnerability and the cost per record, including fines for unauthorized disclosure.
