

Stop Threats in their Tracks with Incident Response

5

ways Cisco Incident Response provide a clear path to a ready and resilient business

Expertise in action

1

The Cisco® Incident Response team is led by elite security specialists who can uncover the source of threats by analyzing and synthesizing intelligence from multiple sources. These sought-after specialists consistently deliver resolution in a shorter timeframe, returning businesses like yours to normal. Fast.

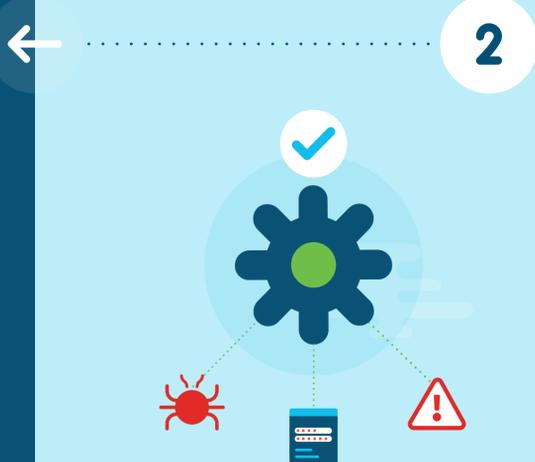

→ Incident Response named as Leader

Unlock the power of threat intelligence

The Talos™ Security Intelligence and Research Group (Talos) is made up of over 300+ industry-leading threat intelligence experts. With Talos, you get access to the latest threat intelligence, fast, and our incident response team works hand-in-hand with threat researchers to keep our clients up-to-date. With so many known and unknown threats, it pays to invest in your ability to detect, analyze, and protect against threats.

Comprehensive critical threat defense

3

The flexible Incident Response Retainer offers proactive defense services such as assessments, threat hunting, tabletop exercises, and purple teaming and helps to ensure an elite cybersecurity team is on call in the event of a breach. If you do require emergency assistance, our responders are traveling on site within 4 hours to remediate any data breaches.

→ Incident Response Readiness and Retainer

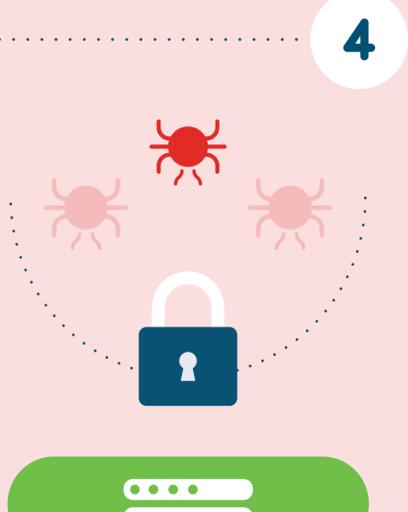

Stay ahead of threats before they attack

Don't wait for an incident to occur to take action. Identify vulnerabilities before they impact your organization. Our responders will work with your team to hunt for and address existing adversaries in your network.

Costs associated with lost business as the result of a breach average US\$3.62 million.

→ Proactive Threat Hunting

4

Remediate threats quickly and efficiently

5

In the event of a breach, the Cisco elite team will act immediately through remote access, and will be traveling onsite in 4hrs. We'll bring every piece of equipment needed and activate 60-day trial licenses for **Cisco Advanced Malware Protection (AMP)**, **Umbrella**, and **Stealthwatch to speed remediation.**

Our mean time to respond: 30 minutes. The industry average: 4 hours.
